

Nguyen Khanh Duc

Hanoi, Vietnam | immonnguyen@gmail.com | +84 326234477 | duck-monorepo.github.io

Professional Summary

Software Engineer with 7+ years of experience building scalable web applications using React.js, Next.js, NestJS, and Node.js. Strong expertise in frontend architecture, backend API development, micro frontends, and cloud-native systems. Experienced in delivering high-performance products.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Zustand, Tailwind, Micro Frontend, React Query

Backend: Node.js, NestJS, Express.js, REST APIs, GraphQL, WebSockets, Authentication (JWT/OAuth), Prisma

Database & Cloud: PostgreSQL, MongoDB, Redis, AWS, Docker, Firebase, Vercel, CI/CD, GitHub Actions

Tools: Git, TurboRepo, NX, Storybook, Jest, Playwright, ESLint, Prettier, Webpack, Vite, Cursor, Claude Code

Work Experience

Lead Software Engineer, Deputy – Hanoi, Vietnam Dec 2023 – Present

- Led development of end-to-end encrypted **Deputy Messaging** web-app from the early idea stage to serving 10K+ concurrent users on production, achieving 99.9% uptime
- Designed mechanisms for message sync, offline-first experiences, optimistic sending, delivery/read receipts, retry handling, conflict resolution to ensure a reliable chat experience under varying network conditions.
- Contributed to the Micro Frontend platform by building shared SDKs, improving Storybook, and defining common patterns used across teams
- Guided teammates through code reviews, pair programming, and technical discussions.
- Improved Messaging performance by reducing unnecessary re-renders, virtualizing large message lists, and optimizing real-time updates for smoother user interactions.

Senior Software Engineer, EPAM Systems – Ho Chi Minh City, Vietnam June 2022 – Nov 2023

- Contributed to the development of **Primark Click&Collect**, serving customers across the UK and Europe to browse, reserve, and collect products in-store
- Built high-performance experiences using Next.js, React.js, and TypeScript, supporting large-scale retail traffic
- Developed scalable frontend modules for product discovery, store selection, order tracking, and collection workflows integrated with GraphQL APIs
- Enhanced accessibility compliance (WCAG) and expanded automated testing coverage

Software Engineer, OPSWAT – Ho Chi Minh City, Vietnam Sep 2020 – June 2022

- Developed and maintained **OPSWAT MetaDefender Kiosk**, a secure media scanning and threat prevention platform used in critical infrastructure environments
- Built a React/Electron frontend that consumed Protocol Buffer streams from a C++ scanning engine to visualize and navigate 100K+ scanned files using lazy loading and virtualized tree rendering, maintaining a responsive user experience files traversal and during real-time scans.
- Built and maintained complex workflow management features in a React application integrated with enterprise LDAP/Active Directory systems, supporting large organizations and U.S. police departments.

Intern Software Engineer, Comspaces – Ho Chi Minh City, Vietnam Nov 2018 – Jan 2020

- Developed social networking and messaging platforms using React.js and Node.js
- Worked with microservices and distributed databases for scalable application architecture

Education

Bachelor of Information Technology, Ho Chi Minh City University of Technology and Education Sep 2016 – Sep 2020
